TECHNICAL DATA SHEET

MAE

Design: **Seniorcare**

The MAE collection is ideal for furnishing rooms and various spaces in healthcare facilities. The wide variety of pieces, combined with the option to mix different melamine finishes, provides an effective solution for any interior design project. As every project is unique, we also offer the possibility to customize and adapt any piece in the collection.

RECOMMENDED USE

Collection of furniture for bedrooms and all types of spaces.

TECHNICAL FEATURES

Premium quality melamine-coated particle boards on both sides, resistant to cracking, scratches, and stains.

- Boards available in 19 mm and 35 mm thicknesses.
 - 19 mm boards are used for drawer fronts and doors, as well as for sides and internal shelves of all furniture units.
 - 35 mm boards are used for wardrobe bases and tops, wall shelves, uprights, countertops, and headboards.
 - 3 mm MDF board is used for wardrobe backs.

Board characteristics:

Particle boards and MDF comply with Class E1 requirements as defined in the European Standard EN 14322.

Melamine-coated particle boards feature a smooth and homogeneous surface, suitable for general use in dry environments (classified as P2 according to UNE-EN 312).

The board manufacturer has implemented PEFC (PEFC/14-35-00006) and FSC (FSC-C041397) Chain of Custody certification systems, ensuring that 100% of the wood used comes from sustainably managed forests.

Antibacterial property: *the surface of our melamine inhibits the growth and proliferation of bacteria, preventing their reproduction so that they age and die. This effect remains effective throughout the entire service life of the product.*

Antiviral property: *tested by AINIA against Influenza A Virus (H3N2) (A/Hong Kong/8/68 H3N2) (ATCC VR-1679), demonstrating a 90% reduction in viral load after 24 hours of incubation compared to the initial infectious dose, and a 77% effectiveness compared to inert plastic, in accordance with procedures based on ISO 21702:2019 and NF EN 14476:2013+A2:2019 standards.*

1 mm PVC edging on sides and interior shelves, as well as on doors and drawer front.

Three-dimensionally adjustable hinges with integrated soft-closing system and automatic clip-on mounting.

Interior and exterior sliding doors with soft-close mechanism.

All drawers feature concealed metal runners with standard soft-close system.

White castors with soft-rolling light grey tread. All furniture with wheels is fitted with front brakes as standard.

Grooved back panel system.

Drawer and storage unit interiors feature a “textile” finish.

Interior wardrobe shelves with quick mount click supports, including locking and secure assembly system.

ECOLOGY

Seniorcare's sustainable furniture is developed through an eco-design process and manufactured from wood sourced from fast-growing species harvested from responsibly managed forests, certified under internationally recognized standards such as FSC.

The wood we use comes from environmentally responsible forest management, ensuring high-quality raw materials to manufacture sustainable, durable, and robust furniture.

We also operate under PEFC Chain of Custody certification through our suppliers, reinforcing our commitment to responsible and "green" procurement policies.

The boards used in our furniture are melamine-face and comply with European standards, helping us to protect our customers' health while reducing environmental impact. Additionally, 85% of these boards are made from recycled material, and their design is optimized to utilize up to 97% of the material, with the remaining waste reused as packaging.

Our collections are entirely manufactured in Spain, using recycled and recyclable raw materials sourced locally (zero-kilometre materials).

ISO 14001 Certified.

The production processes of SENIORCARE INTERIORS are certified according to the ISO 14001 environmental standards to minimize any impact on the environment.

Seniorcare Interiors holds the Registration Certificate in the Carbon Footprint, Compensation, and CO₂ Absorption Projects Registry of the Ministry for the Ecological Transition and the Demographic Challenge. Carbon footprint code: 2024-a3268

CERTIFICATES AND STANDARDS

ISO 9001 Certified

SENIORCARE INTERIORS has its quality management certified in accordance with the ISO 9001 standard across all processes of design, manufacturing, and marketing of its products.
