RECOMMENDED USE

Waiting areas, dining rooms and rest areas.

STRUCTURES

Base made of top-quality solid beech wood with a 50x30 mm profile and rounded edges along the entire perimeter for user safety. The armrests, with a 50x20 mm profile and also rounded edges, extend forward in the reclining versions to assist the user when standing up. The wood is finished with polyurethane varnishes applied in a three-coat process. The legs are fitted with high-durability, wear-resistant Teflon glides that protect the floor, reduce noise, and make it easier to move the chairs.

SEATS

Inner seat made of compacted chipboard or a wooden frame (depending on the version), covered with flexible, high-density (35 kg/m³), high resilience (HR) **fire-retardant** polyurethane foam. Fixed to the frame at four points.

BACKRESTS

Wooden frame with an ergonomic shape for perfect adaptation to the user's back. Covered with flexible, high-density (28 kg/m³), high resilience (HR), **fire-retardant** flexible polyurethane foam.

MECHANISMS

In the versions with a reclining option, the movement is operated by a gas piston, easily controlled by a lever from the seated position.

BENCHES

Available in fixed formats of two or three seats, with a central armrest and the option of a side or central auxiliary table. Optionally, by using the connecting piece, benches of any length can be created by combining individual armchairs and sofas.

COFFEE AND CORNER TABLES

Multipurpose auxiliary table made with a top-quality solid beech wood frame. Rounded edges along the entire perimeter for user safety. Beech wood veneered top. The finish is applied with polyurethane varnishes in a three-coat process.

TESTS CONDUCTED. COMPLIANCE WITH THE STANDARD.

Tests conducted at: AIDIMME - Technological Institute for Metalworking, Furniture, Wood, Packaging, and Related Industries.

The tests performed on the model are those indicated and applicable according to the standards:

-UNE-EN 16139:2013 + A1:2015, Furniture. Strength, durability and safety in accordance with the European standard for public-use seating. Requirements for non-domestic seating under Level 2 (severe) public-use conditions.

The test procedures are described in the standards:

-UNE-EN 1728:2013, Furniture. Seating. Test methods for determining strength and durability.

The tests were carried out following the procedures described in the standards, and the results were **COMPLIANT**.

ECOLOGY

ISO 14001 Certified.

The production processes of SENIORCARE INTERIORS are certified according to the ISO 14001 environmental standards to minimize any impact on the environment.

Seniorcare Interiors holds the Registration Certificate in the Carbon Footprint, Compensation, and CO₂ Absorption Projects Registry of the Ministry for the Ecological Transition and the Demographic Challenge. Carbon footprint code: 2024-a3268

CERTIFICATES AND STANDARDS

ISO 9001 Certified

SENIORCARE INTERIORS has its quality management certified in accordance with the ISO 9001 standard across all processes of design, manufacturing, and marketing of its products.

WARRANTY

5 years

FINISHES

Wood: All colour options indicated in our finishes book.

Upholstery: All fabrics listed in our finishes book.

All our fabrics—except Apollo—are vinyl-based and feature antibacterial, antimicrobial, and antifungal properties.

They offer high abrasion resistance, reaching up to 300,000 Martindale cycles in some cases.

RECOMMENDED MAXIMUM WEIGHT

140 kg
